# Software solutions that work for your classroom

## ELDER IS:

- EASY TO INSTALL
- HUNDREDS OF EDUCATIONAL SOFTWARE AND ACTIVITIES
- SUBJECT SPECIFIC
- SUPPORTED
- FREE!

Children are avid and skilled explorers of technology – it always amazes parents what they know or what they can do with a laptops, cell phones, mp3 devices or even the internet. Educators recognize this ability as well, and there have been multiple movements to get computers into classrooms including Computers for Schools (CFS), Renewed Computer Technology, and even One Laptop Per Child.

## However, having computers is only one part of the solution!

### Why ELDER?

The **Educational Linux Distribution Electronic Resource** (ELDER) Project is a grassroots community movement that dedicates itself to providing curriculum ready, user friendly, supported and most importantly FREE educational software tools for teachers, parents and students. With ELDER, educators and students with the educational software tools necessary to transform their classroom computer into a healthy learning environment where everyone can learn, create and share for life.

### Pre-packaged

Only one installation is necessary to gain access to dozens of great educational software

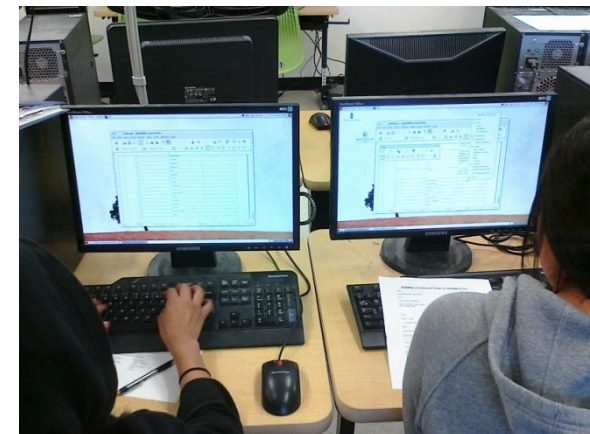

### Grade-Appropriate

Edubuntu is a rich environment for grades 6 and up, while QIMO is child-oriented for kindergarten to grade 4. If you have XO laptops, you can experiment with the award-winning SUGAR environment built for collaborative learning.

### Other Benefits

No viruses - Runs fast on older computers - User friendly - Community support - Internet not required. Did we mention all this for free?

## You're invited!

First Nations schools, organizations and communities are invited to work with us in developing the ELDER project. For more information, come visit our site at:
